AIRPASS®

The trendy slim

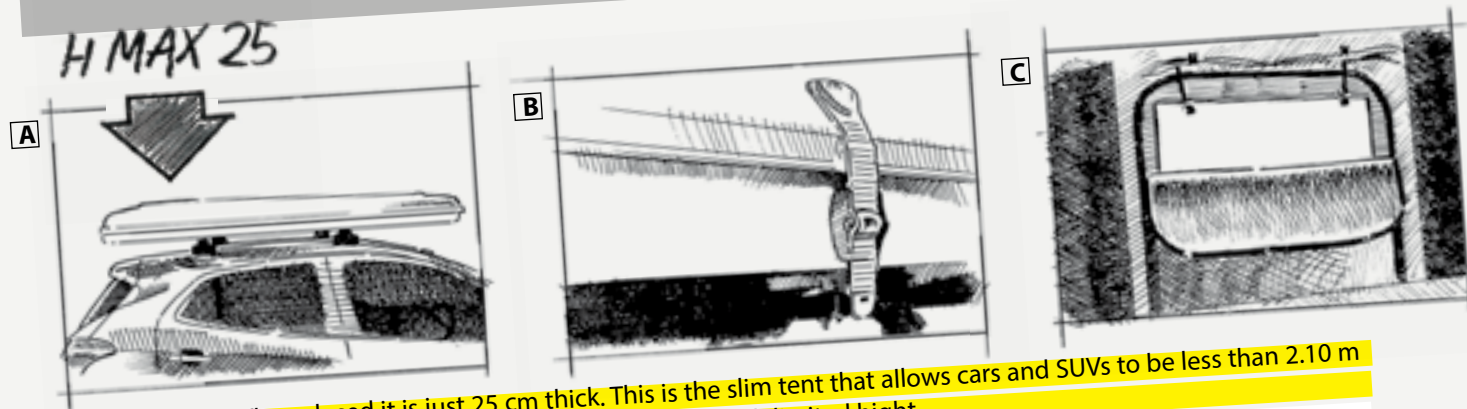

When closed it is just 25 cm thick, but the technical features are excellent. The "Made in Italy" range of tents are produced with fibreglass shells, anti-condensation roof insulation, high quality finish and a light and elegant design. It can fit cars, high vehicles, vans and 4x4.

AirPass: in order to go where others can't. The new entry on the market has enough space inside to carry pillows and sleeping bags on the high density foam mattress (equipped).

For a great adventure or a relaxing week end with the family, AirPass will accompany you in discovering the most suggestive itineraries, even the ones with architectural barriers, and in the underground car parks. For a trendy look chose the slim range, compact and ultra thin.

Black Rain: Exclusive range, with Carbon color textile and Black Rain color Shells.

Shells: handmade Fiberglass shells that are insulated: they don't absorb heat and are easily repairable (unlike plastic-made shells). From the English word GPR "Glass reinforced plastic", or GFK in German.

A - New! When closed it is just 25 cm thick. This is the slim tent that allows cars and SUVs to be less than 2.10 m high. This way is possible to park the vehicle in places with limited height.

B - Rally race: 4 adjustable safety catches made by ARNITEL® (2 on the front and 2 on the rear).

C - On the door there are 2 arched zips for partial openings, that allow privacy, and a better ventilation and reduction of condensation.

SMALL

Aerodynamic version.
Recommended for two adults.
130x210

MEDIUM

Aerodynamic version.
Recommended for two adults and a child.
145x210

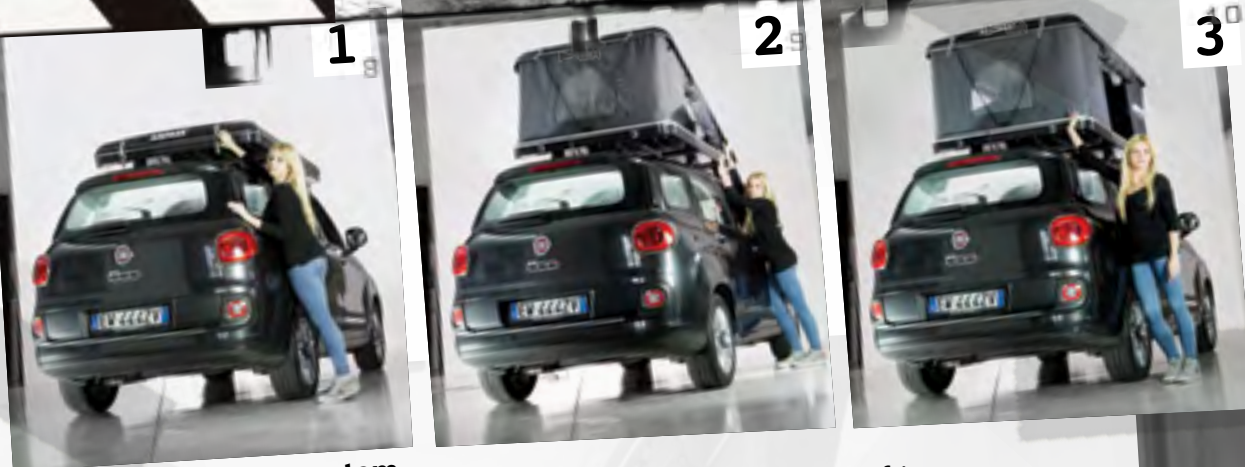

LARGE

Aerodynamic version.
Recommended for two adults and two children.
